

A maintenance program with flexibility.

To help our customers avoid unnecessary downtime, equipment repairs and major repair expenses, **GCS** is offering a preventive maintenance program for your prime mover control systems. The six-day service contract includes two, one-day service calls and two, two-day service calls. The time frame of the program can be tailored to fit your company's schedule and demands.

Many of our customers are uncertain about the specific governor needs of their vessels. To clarify and outline these needs, **GCS** now offers a one-day service call at a fixed rate. (Additional travel charges may apply if outside the Miami/Ft. Lauderdale area.) A **GCS** service engineer will complete an equipment matrix, check equipment linkages, governor settings, and tune equipment if possible. We will also provide you with a status report of your equipment and recommend further service if necessary. If after the one-day service call you decide that the six-day service contract would be more beneficial, we will apply the single day towards the six-day maintenance program. The program is set up to be flexible and cost effective.

*The following is a list of what you can expect from the **GCS** service engineer during his service.*

1. Document part numbers and serial numbers of all governor and governor auxiliary equipment.
2. Document governor running hours if available and inspect condition of governor oil.
3. Inspect internal components to ensure governor does not have any immediate repair needs.
4. Inspect all governor and fuel pump linkages and pins for excessive wear.
5. Tune dynamics on governor for optimum performance as well as document parameters as applicable.
6. Educate personnel on proper installation and set up of governor system.
7. Assist customer with any immediate concerns or needs on their control system.
8. Provide customer with a recommended spare part bill of material.
9. Provide customer with recommended upgrade if customer's equipment has been discontinued.
10. Provide customer with a complete service report for recommended, immediate or future services.

To take advantage of this cost-effective program or for additional information, contact the **GCS service department** at **(954) 462-7404**.
