

TEST EQUIPMENT FROM

Governor Control Systems

CS-2

Battery-Operated *Current Source Adapter*

Designed to test **WOODWARD** governors and actuators. The unit contains a

current regulator circuit for stable performance throughout battery life.

Used in conjunction with a standard digital volt/amp meter.

\$1000

CS-2 Current Source Adapter
(Optional AC/DC transformer available)

F-16

Signal Generator/Counter/Calibrator

Used to calibrate tachometers, digital speed indicators, governors, counters, frequency meters.

Measures signal frequency from magnetic pickups, pulsers, ac generators, shaft encoders.

Eliminates the need for a frequency counter or an audio generator. **\$875**

Rugged aluminum case withstands harsh environments.

For more information or to order your **CS-2** Battery-Operated Current Source Adapter, or **F-16** Signal Generator/Counter/Calibrator, contact **GOVERNOR CONTROL SYSTEMS.**
