Description

The Woodward L-Series Integrated Engine Control System is the first engine speed control to deliver so much in a package this compact.

It can also deliver a big savings in production and field support. Since the L-Series Control System is microprocessor-based, it can easily be programmed to match the operating parameters of every engine you produce. The L-Series offers speed control with software-selectable speed setpoints, dynamics, fuel limiting, and start/stop behavior. All it takes is a PC and a simple, plug-in download on your production line.

With many built-in functions, this microprocessor-based speed control allows a high-volume OEM or packager to stock one part number, but implement a wide variety of engine control strategies by configuring the four auxiliary inputs at their factory.

Besides the traditional bracket mount using external linkage, the L-Series Control System is available in a variety of mechanical configurations, including one integrated into a rotary diesel fuel pump and one integrated with a throttle body or a throttle body and mixer (product spec 03222). The externally mounted systems can be configured for clockwise or counter-clockwise (standard) shaft rotation for increasing fuel.

The L-Series control’s high-efficiency torque motor delivers 0.34 N•m (0.25 lb-ft) nominally over 60° travel range to operate fuel or air control devices (see specifications for torque performance over the full product temperature range).

Other L-Series control features:

- Low cost engine control
- Fully integrated actuator and speed control
- Small package—greater design flexibility
- Suitable for gasoline, gaseous, and diesel fueled engines
- Microprocessor-based
- Tamper-resistant
- Easy setup and tuning using PC-based Service Tool
- Discrete output driver for fault indication
- Voltage output for throttle position indication
- Configurable I/O
### Specifications

### Control Characteristics

- **Speed Input and Range**
  - Magnetic pickup or ignition coil
  - MPU input: 1–12 000 Hz, 1–720 teeth, 1 Vrms min.
  - IGN input: 1–480 Hz, 1–20 cylinders with rated speed up to 4000 rpm
  - Target speed: programmable
  - Speed range: programmable

- **Steady State Speed Regulation**
  - Fuel Type | Gasoline | Diesel | Gaseous |
  - MPU input  | ±0.35%   | ±0.25% | ±0.35%  |
  - Ignition input | ±0.50%  | n/a   | ±0.50%  |

### Functions/Auxiliary Inputs

- **Function Options**
  - Isochronous Speed (50 or 60 Hz);
  - Two or Three Speed;
  - Droop;
  - Start Fuel Limiter;
  - Load Sharing;
  - Dual Dynamics;
  - Adjustable Max Fuel Stop;
  - Manifold Air Pressure Biased Fuel Limiter;
  - Cold Start Timer

- **Programming Port I/O**
  - 0–5 V throttle position indication
  - Discrete out for fault indication
  - 4 aux inputs, configurable functions

### Environment

- **Operating Temperature**
  - –40 to +105 °C (–40 to +221 °F)
- **Storage Temperature**
  - –40 to +125 °C (–40 to +257 °F)
- **EMC**
  - EN61000-6-2: Immunity for Industrial Environments
  - EN61000-6-4: Emissions for Industrial Environments
  - SAE J1113-21: Radiated Immunity (100 V/m)
  - SAE J1113-11: Conducted Transient Immunity – Pulse 5b, Suppressed Load Dump (45 V)
- **Humidity**
  - US MIL-STD 810E, Method 507.3, Procedure III
- **Shock**
  - MS1-40G 11 ms sawtooth
- **Vibration**
  - Random: 0.3 G²/Hz, 10–2000 Hz (22.1 Grms) 3 h/axis
  - Sine: 5 G 2.5 mm peak-to-peak, 5–2000 Hz, 3 h/axis, 90 min dwells, 1 octave/min
- **Thermal Shock**
  - SAE J1455, Paragraph 4.1.3.2
- **Fluid Resistance**
  - IP56 per EN60529

### Compliance

- **CE**
  - Compliant with EMC Directive 89/336/EEC
- **Other**
  - Compliant as a component with Machinery Directive 98/37/EC
- **CSA**
  - Class I, Division 2, Groups A, B, C, D T3C
  - These listings are limited only to those units bearing the CSA agency identification.

### Technical Manual
